Notes for AEs

High Candela models are notated as HP (high performance)
Candela refers to the distance this more concentrated beam of light travels. Larger "hot spot", best used for identifying objects further away. Punches through smoke, fog, and window tint. Best used outdoors.

High Lumen models are notated as HL (high lumen)
Lumen refers to the amount of light being output in a "flood" like manner. This is a more practical EDC option for most applications, specifially indoors.

X models indicate the ability to be recharged featuring Streamlight's proprietary SLB line of batteries.
